

# BIOL 441

## Molecular Genetics

Fall Term (2015-16)

### CALENDAR DESCRIPTION

**Current research in molecular genetics including gene regulation, transformation, cell proliferation and the analysis of development. Specific topics will vary depending on the instructor but will include plant, insect and mammalian genetics.**

PREREQUISITE BIOL 330/3.0 or BCHM 218/3.0 or MBIO 218/3.0.

EXCLUSION No more than 3.0 credits from BIOL 441/3.0; PATH 425/3.0.

### SCHEDULE

Refer to SOLUS for details.

<b>Instructor</b>	<b>Drs. V.K. Walker &amp; L. Seroude</b>
<b>Instructor Contact</b>	walkervk@queensu.ca; Phone: 613-533-6394
	seroude@queensu.ca; Phone: 613-533-6769
<b>Office Hours</b>	See posted on office door (2522) or contact instructor
<b>TA:</b>	Melissa Bredow
<b>TA Contact Information</b>	11mb95@queensu.ca
<b>Office Hours</b>	Mondays 3:30-5:30 (confirm with instructors)

### Learning Objectives

The goals of Biology 441 are to allow students to develop confidence and sufficient breadth of knowledge to discuss and write about a wide range of controversial topics in the area of molecular genetics and epigenetics. Tutorial session topics vary broadly and range from synthetic biology to prions and interfering RNA, and from the ethics of GMO food aid to new forms of eugenics. Lectures provide sufficient background knowledge in molecular genetics so that self-directed learning on a topic of the students' choice can be achieved. A student's investigation will be of sufficient depth so that an oral presentation and a formal grant proposal can be developed. Topics for in-depth study include but are not limited to a variety of human diseases, circadian clocks, immunity, transposable elements, epigenetic memory, dosage compensation and resistance development in a range of microorganisms and metazoans, including model plant, insect and mammalian model systems.

### Learning Hours

<i>Teaching method</i>		<i>Average hours per week</i>	<i>Number of weeks</i>	<i>Total hours</i>
In-	Lecture	2-3	10	30
	Seminar	4	2	8
	Laboratory			

	Tutorial			
	Practicum			
	Group learning	1	10	10
	Individual instruction			
Other	Online activity			
	Off-campus activity			
	Private study	4.8	13	63
Total hours on task				111

### Course Outline

- DNA, then & now: 1) introduction & review; synthetic biology ethics [groups]  
 2) heterochromatin and euchromatin
- Genome plasticity 3) chromatin inactivation  
 4) chromatin diminution/ gene conversion [groups]  
 5) chromatin changes in development  
 6) genome rearrangements  
 7) epigenetic phenomena I: imprinting [groups]  
 8) gene amplification  
 9) trinucleotide repeats and pathologies  
 10) epigenetic phenomena II: prions [groups]  
 11) gene magnification  
 12) transposable elements  
 13) TEs & chromatin  
 14) jumping genes & mutation  
 15) epigenetic phenomena III: noncoding RNAs [groups]
- Genes & development: 1) TEs and gene transfer  
 2) mitochondria and senescence  
 3) epigenetic phenomena IV: TEs [groups]  
 4) circadian rhythms  
 5) neurodegeneration and mental health (N & MH): series  
 6) the new agriculture [groups]  
 7) N & MH: ADHD and neurological drugs  
 8) N & MH: addiction and decision making  
 9) cloned mammals [groups]  
 10) student seminars and evaluations start and continue  
 11) the business of DNA [groups]  
 12) student seminars & evaluations  
 13) eugenics [groups]  
 14) student seminars & evaluations

### Textbooks/Readings

A course book is available for purchase prior to the 1<sup>st</sup> week of classes from P&CC (purchase price covers the cost of production and copyright charges).

### Suggested Grading Scheme

Component	Weight (%)	Date
Participation P	12%	Throughout (Sept-Nov)
Seminar	18%	TBA (late Oct- Nov)
Research proposal	30%	3 <sup>rd</sup> week of Nov
Referee Exercise	5%	Last week of term
Final exam	35%	As scheduled in Dec

### **Grading Method**

In this course, some components will be graded using numerical percentage marks. Other components will receive letter grades, which for purposes of calculating your course average will be translated into numerical equivalents using the Faculty of Arts and Science Letter Grade Input Scheme.

When letter grades are employed, the following scale will be employed for purposes of calculating your course average:

#### ***Arts & Science Letter Grade Input Scheme***

Assignment mark	Numerical value for calculation of final mark
A+	93
A	87
A-	82
B+	78
B	75
B-	72
C+	68
C	65
C-	62
D+	58
D	55
D-	52
F48 (F+)	48
F24 (F)	24
F0 (0)	0

### **Academic Integrity and Queen's Code of Conduct**

Students are responsible for familiarizing themselves with the regulations concerning academic integrity and for ensuring that their assignments and conduct conform to the principles of academic integrity. Information is available in the Arts and Science Calendar (see Academic Regulation 1 -

<http://www.queensu.ca/artsci/academic-calendars/regulations/academic-regulations>, on the Arts and Science website (see <http://www.queensu.ca/artsci/academics/undergraduate/academic-integrity>), and at Biology's website (<http://www.queensu.ca/biology/undergrad/integrity.html>) and from the instructor of this course. Departures from academic integrity include plagiarism, use of unauthorized materials, facilitation, forgery and falsification, and are antithetical to the development of an academic community at Queen's. Given the seriousness of these matters, actions which contravene the regulations on academic integrity

carry sanctions that can range from a warning or the loss of grades on an assignment to the failure of a course to a requirement to withdraw from the university.

### **Accommodation Policy, Exam Conflicts, and Other Conflicts**

Students who feel they need accommodations for disabilities or extenuating circumstances, or have a conflict between exams or other commitments should consult the Biology Department's website for details about how to proceed (<http://www.queensu.ca/biology/undergrad/integrity.html>). In general, the earlier a course coordinator is apprised of an extenuating circumstance, the more likely an accommodation can be made. Students are encouraged to be proactive in anticipating difficulties, when it is possible to do so.

Students may apply to write a make-up or deferred exam if they have an exam conflict as defined in the Academic Regulations of the Faculty (See Arts and Science Calendar Regulation 8 - <http://www.queensu.ca/artsci/academic-calendars/regulations/academic-regulations>). In this case, the student should report to the Exams Office first to verify that there is a genuine exam conflict. Biology professors will not consider your situation to be a conflict unless it meets the criteria set out by the Faculty of Arts and Sciences.

Students may request a make-up or deferred exam if they have an exam conflict with off-campus travel associated with a field course (e.g BIOL-307/3.0 or 407/3.0) that is held during the fall or winter terms.

### **Copyright**

This material is designed for use as part of BIOL 441 at Queen's University and is the property of the instructor unless otherwise stated. Third party copyrighted materials (such as book chapters and articles) have either been licensed for use in this course or fall under an exception or limitation in Canadian Copyright law.

### **Accommodation of Disabilities**

*Queen's University is committed to achieving full accessibility for persons with disabilities. Part of this commitment includes arranging academic accommodations for students with disabilities to ensure they have an equitable opportunity to participate in all of their academic activities. If you are a student with a disability and think you may need accommodations, you are strongly encouraged to contact the Disability Services Office (DSO) and register as early as possible. For more information, including important deadlines, please visit the DSO website at: <http://www.queensu.ca/hcds/ds/>*
