
BIOL 442
Evolutionary Medicine
Winter Term (2016)

CALENDAR DESCRIPTION

An exploration of human disease, illness, and injury, and the symptoms and treatments of medical conditions, with an evolutionary framework.

Prerequisite: BIOL 206/3.0

SCHEDULE

Lectures:

Tuesdays 11:30-12:30, Fridays 12:30-13:30; Ellis Hall Rm 226

Tutorials:

Tuesdays 9:30-11:30, Wednesdays 11:30-13:30, Fridays 9:30-11:30; Biosci Rm 3110

Instructor	Dr. Fran Bonier
Instructor Contact	bonierf@queensu.ca, Biosci3523
Office Hours	Tuesdays 12:30-13:30, Fridays 13:30-14:30
TA:	TBA

Learning Objectives

The goal of Biology 442 is to guide students in applying an evolutionary framework to better understand human medical conditions and illnesses, and to deepen students' understanding of fundamental evolutionary concepts. In the process, students will improve their critical thinking and communication skills through participation in in-class and tutorial discussions, writing independent and group projects, and delivering an oral presentation to their tutorial section.

Learning Hours

<i>Teaching method</i>		<i>Average hours per week</i>	<i>Number of weeks</i>	<i>Total hours</i>
In-class hours	Lecture	2	12	24
	Seminar			
	Laboratory			
	Tutorial	2	10	20
	Practicum			
	Group learning	2	8	16
	Individual instruction			
Other	Online activity	1	12	12
	Off-campus activity			
	Private study	4	12	48
Total hours on task				120

Course Outline

More information can be found at the course blog: <http://442evolmed.wordpress.com/>

The following is a general overview of some topics to be covered in the course:

1. The scientific method and hypothesis testing
2. Fundamental evolutionary theory
3. Why Evolutionary medicine?
4. Pathogen diversity and human evolution
5. Human genetic variation of medical relevance
6. Life history tradeoffs and human health
7. Parasites and pathogens
8. Evolution of virulence
9. Antibiotic resistance
10. Pathogen evolution & vaccines
11. Diversity in viruses
12. Disease emergence
13. Developmental plasticity
14. Cancer

Textbooks/Readings

Required text: TBD, but most likely *Evolution in Health and Disease* by Stearns and Koella

Other required readings from the primary literature to be provided on Moodle site and/or course blog (<http://442evolmed.wordpress.com/>)

Grading Scheme

Component	Weight (%)
Pre-test	2%
Quizzes in class or online	25%
Major project (3 parts)	42%
Tutorial assignments	15%
Tutorial participation	10% (1% per session)
In-class participation	6% (0.5% per week)

Grading Method

In this course, all components will be graded using numerical percentage marks. Your course average will then be converted to a final letter grade according to Queen's Official Grade Conversion Scale:

Queen's Official Grade Conversion Scale

Grade	Numerical Course Average (Range)
A+	90-100
A	85-89
A-	80-84
B+	77-79
B	73-76
B-	70-72
C+	67-69
C	63-66
C-	60-62
D+	57-59
D	53-56
D-	50-52
F	49 and below

Academic Integrity and Queen's Code of Conduct

Students are responsible for familiarizing themselves with the regulations concerning academic integrity and for ensuring that their assignments and conduct conform to the principles of academic integrity. Information is available in the Arts and Science Calendar (see Academic Regulation 1 - <http://www.queensu.ca/artsci/academic-calendars/regulations/academic-regulations>, on the Arts and Science website (see <http://www.queensu.ca/artsci/academics/undergraduate/academic-integrity>), and at Biology's website (<http://www.queensu.ca/biology/undergrad/integrity.html>) and from the instructor of this course. Departures from academic integrity include plagiarism, use of unauthorized materials, facilitation, forgery and falsification, and are antithetical to the development of an academic community at Queen's. Given the seriousness of these matters, actions which contravene the regulations on academic integrity carry sanctions that can range from a warning or the loss of grades on an assignment to the failure of a course to a requirement to withdraw from the university.

Accommodation Policy, Exam Conflicts, and Other Conflicts

Students who feel they need accommodations for disabilities or extenuating circumstances, or have a conflict between exams or other commitments should consult the Biology Department's website for details about how to proceed (<http://www.queensu.ca/biology/undergrad/integrity.html>). In general, the earlier a course coordinator is apprised of an extenuating circumstance, the more likely

an accommodation can be made. Students are encouraged to be proactive in anticipating difficulties, when it is possible to do so.

Students may request a make-up or deferred assignment deadline or quiz if they have a conflict with off-campus travel associated with a field course (e.g BIOL-307/3.0 or 407/3.0) that is held during the winter term.

The 2 in-class or online quizzes with the lowest mark for each student will be dropped before calculating the final grade. Make-up quizzes will not be offered, but students who have made PRIOR arrangements with the instructor might be permitted to have quizzes pro-rated if they are missed due to illness, family emergencies, or other extenuating circumstances, dependent on approval by the instructor.

Assignments must be submitted by the posted deadlines, barring any prior arrangements approved by the instructor due to extenuating circumstances. Assignment marks will be reduced by 5% for each day late up to 3 days, then 10% per day up to 7 days. Assignments will be assigned a mark of 0 if they are submitted more than 7 days after the posted deadline.

Copyright

This material is designed for use as part of BIOL 442 at Queen's University and is the property of the instructor unless otherwise stated. Third party copyrighted materials (such as book chapters and articles) have either been licensed for use in this course or fall under an exception or limitation in Canadian Copyright law.

Accommodation of Disabilities

Queen's University is committed to achieving full accessibility for persons with disabilities. Part of this commitment includes arranging academic accommodations for students with disabilities to ensure they have an equitable opportunity to participate in all of their academic activities. If you are a student with a disability and think you may need accommodations, you are strongly encouraged to contact the Disability Services Office (DSO) and register as early as possible. For more information, including important deadlines, please visit the DSO website at:
